

## SRP-210

SRP-210 is the perfect product for quickly and effectively repairing damaged metal shoulders. Developed by WVCO Railroad Division chemists, the SRP-210 compound is designed to fill worn metal shoulders and extend the service life of concrete railroad ties.

## SRP-210 Benefits

SRP-210 is easy to use and cures quickly upon mixing, which allows for controlled dispensing and application of the product. Each 450 ml cartridge holds enough product to repair between 50 and 60 rail shoulders. Start experiencing superior rail shoulder performance, minimizing tie maintenance time and decreasing replacement expenses by using SRP-210.

## Metal Shoulder Repair

## SRP-210

SRP-210 is easy to use and cures quickly.

## Where to use SRP-210

- Damaged concrete ties – repairs worn metal shoulders
- Between shim and shoulder – adheres to shim

## What you can expect from SRP-210

- Quick cure times
- Restore original geometry
- Lower maintenance costs
- Easy to apply

## Packaging

Cartridge (450 ml)
