

# Application Instructions

## PQS-COATING

Read **SAFETY DATA SHEET** before handling or applying.  
Always wear appropriate **PPE** during handling and application.

### FOR BEST RESULTS:

Store and handle cartridges upright (60-90°F, 15-32°C)

Condition cartridges to ≥60°F (15°C) before using.

Use with SULZER MixCoat™ 1500 series applicator and air compressor capable of 12CFM @100psi

1. Remove nut and cap.
2. Secure static mix-tube with spray nozzle to cartridge and tighten nut.
3. Load cartridge into dispenser (snaps into place), keep upright.
4. Connect air supply line to applicator.
5. Connect atomizing air line to spray nozzle
6. Purge any air in cartridge by spraying with cartridge upright.
7. Spray initial portion outside application area while adjusting material flow rate (A) and atomizing air pressure (B) to desired levels.
8. Apply continuously with smooth, even passes.  
Do not trigger on and off.
