POLYQUIK® P-480

RAIL REPAIR PRODUCTS

# SPRAY COATING

# POLYQUIK® P-480

## FAST-SETTING POLYUREA COATING

POLYQuik® P-480 is specifically designed to extend the service life of assets by protecting against corrosion, abrasion and concrete damage from a wide range of chemicals. This waterproof, polyurea coating can be sprayed directly to prepared steel and **sets in seconds to form a virtually impenetrable barrier.**

Applied by trained professionals and special equipment, this system provides exceptional quality and effectiveness. With years of proven performance, POLYQuik® P-480 delivers waterproofing and corrosion protection in the toughest environments.

### WHERE TO USE P-480

- >>> Hopper car lining
- >>> Bridge deck waterproofing
- >>> Concrete and steel areas
- >>> Secondary containment

### BENEFITS OF P-480

- >>> Extends railcar service life
- >>> Protects against corrosion & abrasion
- >>> Repairable when damaged
- >>> Fast curing for quick installation

### COMPLIANCE & APPROVALS

- >>> Los Angeles County Sanitation (Grade 3 Redner test)
- >>> Washington Department of Ecology Toxicity Test (Pass)
- >>> Department of Environmental Protection (Florida Approved)
