STRUCTURE COATING & REPAIR

POLYQuik® P-480

POLYUREA COATING

POLYQuik® P-480 is a two-component, aromatic, sprayable, polyurea elastomeric material that can coat, seal and waterproof anything made of concrete, wood or metal. It forms a virtually impenetrable barrier, protecting surfaces from corrosion and is resistant to many chemicals, including hydrogen sulfide, acids and hydrocarbon solvents.

- >>> Two-component cure—sets in seconds to reduce downtime
- >>> Waterproofing above or below grade
- >>> Provides primary and secondary containment
- >>> Superior properties—excellent crack-bridging

FastPatch 5000

CONCRETE REPAIR

FastPatch 5000 is a flexible, tough, cold-applied concrete repair material with excellent adhesion for quick return-to-service applications. This long-lasting product has a high-yield stress and exceptional impact resistance for use on applications like bridge approaches/ departures. It is odorless and is easily applied indoors or outdoors with a meter, kit or cartridge.

- >>> Designed for installation and service in both warm and cool temperatures
- >>> Cures fast—return-to-service time is less than 45 minutes
- >>> 100% solids with low viscosity
- >>> No odor, no VOCs

FastPatch DPR Kit

DISTRESSED PAVEMENT REPAIR

This easy-to-apply, long-lasting material is designed to repair distressed pavement. FastPatch DPR is supplied in complete, ready-to-use kits with a polymer blend of recycled and renewable materials. Each kit comes with two color options, gray or black, and topping sand to blend repair areas with surrounding pavement.

- >>> Long-lasting repair—excellent adhesion and impact absorption
- >>> Freeze-thaw resistant
- >>> Fast cure time helps minimize downtime and interruptions
- >>> Ideal for roadways, parking lots, warehouses, sidewalks and more
